PROFESSIONAL SUMMARY

Data Analyst with 6+ months of hands-on professional experience engineering scalable analytics pipelines, automated ETL workflows, and interactive executive dashboards across SQL, Python, Power BI, Tableau, and Excel. Proficient in dimensional data modeling (DAX), advanced data hygiene/validation, exploratory data analysis, and statistical modeling utilizing Pandas, NumPy, Matplotlib, and Seaborn. Track record in conversion funnel evaluation, behavioral cohort segmentation, and architecting reporting solutions that cut manual processing times by 50% across 100K+ transaction datasets. Pairs robust technical execution with commercial insights from growth marketing and data storytelling, with expanding expertise in modern cloud data architectures (Snowflake, Databricks).

SKILLS

- **Databases & Querying:** SQL (PostgreSQL, MySQL, Oracle SQL), Joins, Subqueries, CTEs, Window Functions, Views, Query Optimization
- **BI & Data Visualization:** Power BI, DAX Measures, Star Schema / Relational Modeling, Power Query, Tableau, Matplotlib, Seaborn
- **Data Transformation & Languages:** Python (Pandas, NumPy), Excel (Power Query, Dynamic Arrays, XLOOKUP, Pivot Tables), ETL / ELT
- **Analytics & Statistical Methods:** Exploratory Data Analysis (EDA), Conversion Funnels, Cohort Retention, A/B Testing, KPI Architecture, MIS Reporting, Statistical Analysis
- **Cloud & Tools:** Snowflake, Databricks, AWS (S3, Athena, Redshift, Glue), Git, GitHub, VS Code, Jupyter, Google Colab

EXPERIENCE

Data Analytics Intern Jun'26 ~ Present
Q Spiders Bangalore, India

- Architected automated data pipelines across SQL, Python, and Power Query, reducing manual data preparation time by 50% and accelerating reporting turnaround for 100K+ records.
- Engineered robust data models in Power BI, writing complex DAX measures for calculated columns, multi-condition filtering, and time-intelligence metrics (e.g., YoY sales growth across 4+ fiscal quarters).
- Leveraged Python (Pandas, NumPy, Matplotlib) to perform exploratory data analysis, validate data integrity, and identify key business trends across multi-source datasets.
- Developed executive Power BI dashboards and Excel KPI models tracking 10+ core business metrics, enabling stakeholders to make data-backed operational decisions.

Email Marketing Intern Oct '25 ~ Feb '26
ASP OL Media Nagpur, India

- Built, scheduled, and monitored automated email marketing workflows targeting US-based audience segments, improving operational delivery efficiency.
- Conducted 15+ A/B tests on subject lines, CTAs, and layouts; boosted average open rates by 18% and click-through rates (CTR) by 12%.
- Queried and segmented 100K+ customer interaction records using SQL, uncovering high-margin seasonal buying patterns that lifted promotional conversion by 15%.
- Designed standardized Excel KPI dashboards tracking 8+ core engagement metrics, delivering weekly performance insights that accelerated executive decision-making.

PROJECTS

E-COMMERCE FUNNEL & RETENTION ANALYSIS (PostgreSQL | SQL | Microsoft Excel | Power BI)

- Cleaned, validated, and normalized 5 interconnected e-commerce datasets using PostgreSQL and Excel, architecting a star-schema relational model in Power BI to evaluate customer lifecycles.
- Authored optimized queries utilizing CTEs, Window Functions, and multi-table Joins to evaluate acquisition channels, purchase behavior, and cohort retention across 10K+ customer transactions.
- Conducted end-to-end conversion funnel analysis uncovering a 33.71% overall conversion rate from product view to purchase, while identifying Organic Search as the top revenue driver (₹23,205.55) with an 83.59% retention rate.
- Developed executive Power BI dashboards with custom DAX measures tracking 9+ KPIs (AOV, CLV, drop-off rates, channel ROI), translating complex behavioral trends into strategic growth recommendations.

RETAIL SALES TREND & CUSTOMER BEHAVIOUR ANALYSIS (SQL | Excel | Data Analysis)

- Analyzed 50,000+ retail transactions using SQL, auditing revenue, order velocity, and unit economics to track sales trajectories across 24 consecutive months.
- Built analytical scripts tracking core financial metrics, measuring a baseline Average Order Value (AOV) of ₹1,850+ and identifying high-margin categories accounting for 65% of total gross revenue.
- Executed advanced demographic and behavioral clustering in SQL, identifying the top 20% of repeat customer segments responsible for 48% of cumulative sales volume.
- Conducted MoM and YoY trend analyses that isolated seasonal peak demand surges (+35% Q4 uplift), delivering structured SQL reporting outputs to guide inventory allocation and demand planning.

EDUCATION

Bachelor of Technology in Computer Science, GANDHI INSTITUTE FOR TECHNOLOGY, BHUBANESWAR Dec'22 ~ May'26
